

Press release

A180

A shower cubicle with a refined style, with customised glass eight millimetres thick that adapts to the shape of the space, with no limits on customisation.

A180 is Arblu frameless shower enclosure with countless configuration possibilities, 15, in niche, corner or wall versions.

Doors opening may be with wing door with a wall hinge, Plus wing door with a glass-to-glass hinge, or sliding.

One of the cubicle main features is the 180-degree door opening, which optimises space and allows a large shower even in a small bathroom.

Particular attention is paid to the closing of the doors. For the hinged solutions in fact the closure is magnetic on the aluminium profile, a simple, fast, useful closure for a light but stable cubicle. For the sliding versions, Arblu uses a patented slow closing system, an automatic closing system where the door is gently guided, just a gentle push is all that is needed.

The profiles are available in polished silver, Alublack, lacquer or in metal and metal brushed colours.

There are 5 glass finishes:

- Transparent
- Satin
- Grey Europe
- Extra light
- Mirror effect

A180 has a height of 2 metres 10 centimetres and comes with Timeless glass treatment, the permanent anti-scale treatment that ensures that the glass is protected from corrosion, does not dull and retains its beauty day after day.
