

Press release

Arblu, Cersaie 2022 Preview

Arblu will be present at Cersaie, the International Exhibition of Ceramic Tile and Bathroom Furnishings scheduled to take place from 26 to 30 September, with an extensive renewal and expansion of its product range.

Arblu is presenting an innovation among its shower enclosure proposals: **A180 Sliding**, a frameless shower enclosure with a refined style and custom size glass, 8 mm thickness.

For the sliding versions, Arblu offers soft closing system, **patent-pending automatic closing system**, where a gently push is all it takes for the door to close softly. The opening can be also with wing door with wall hinges, wing door Plus, with hinges directly on the glass. The A180 stands out for its several possible configurations, 15, among niched, corner or wall versions.

The profiles are available in Silver Brill, Alublack, lacquered or in metal and metal brushed colours. There are 5 glass finishes: Transparent, Satin, Grigio Europa, Extra Light and Mirror effect.

Another important innovation that will be presented concerns the **Tuby System** project, signed by the Arter&Citton studio, which is characterized by the use of tubular-shaped drawn elements, made up of die-cast joints and extruded aluminium profiles, which give rise to different stylistic solutions. Tuby's structure can in fact become a frame for the cabinet, positioning itself between the top and the cabinet, embellishing and modernising it. Tuby can also act as a free-standing structure (or cabinet) with Telaio version. Another stylish proposal that can be realised thanks to

the characteristics of Tuby and its modular system is the mirror; Tuby in fact becomes the frame for the backlit mirror, a solution that can be combined in height and width and can be equipped with shelves in the lower part and integrated spot in the upper part. Tuby can also be used as a frame for a tabletop, a frame into which a top can be inserted from among those available in the various materials in the Arblu catalogue.

In the decorative texture **Pietrableu™** system the innovation concerns the colours available, in fact it will be possible to customize Pietrableu™ not only in the white, ivory, ghiaia,

cappuccino, vulcano, corda, cemento and antracite finishes but in all 44 Arblu colours.

Five textures have been developed by Arblu:

- **Juta**, a surface that reproduces the warp and weft of natural jute
- **Trendy**, a texture reminiscent of the feel of natural stone
- **Well**, the charm of the ancient artisan technique of broken stone
- **Woody**, the natural materic texture of wood
- **Easystone**, a light spatula-finish texture

Pietrableu™ confers the advantage of being able to choose a very versatile material, functional but at the same time pleasant to the touch and aesthetically attractive.

Many other news also regarding furniture, laundry, radiators, shower trays and wallpaper will be shown at the Arblu stand in Hall 21 stand A17 - B16.
